Dual Ark-UTM 16

High Availability . Ultimate Adaptability

High Performance   **High** Availability (HA)   **High** Application

LIONIC
Dual Ark-UTM 16

CT Integrated network security filter

Suitable for SMB and Multiple branch offices

Enterprise-level cyber security features

The comprehensive security features include Anti-Virus, Anti-Intrusion, Anti-WebThreat, Firewall and so on. They effectively block ransomware, phishing websites, malicious viruses, guard against OS system vulnerabilities and SSL/TLS encrypted traffic.

01

Performance Advantage Ultimate Adaptation

Multi-port design and full defense and high performance, protection for various scenarios of industrial areas, having extensive application capabilities.

02

Enhancing network reliability with High Availability (HA)

In the event of a failure, the Standby Ark-UTM 16 takes over seamlessly from the Active one, ensuring uninterrupted network connectivity.

03

Flexible defense deployment

Uses bridge mode by default, allowing for immediate filtering of malicious content without modifying the original network topology.

04

Defense from All Aspects

✓ Block **Ransomware**   ✓ Block **Malicious Viruses**   ✓ Block **Phishing Websites**   ✓ Defend **Against Vulnerability Attacks**

Anti-Virus
Block and destroy the virus instances.

Anti-Intrusion
Prevent from network intrusions like botnet, domain hijacking, and ransomware infections and others.
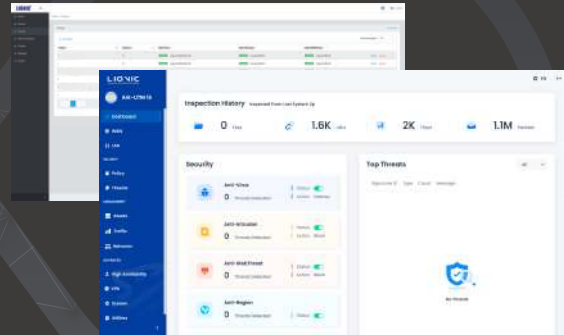

Anti-Web Threat
Block malicious web such as phishing, malware injection and others.

Full Features, Uncompromising Defense

Cybersecurity Threat Intelligence

✓ Sustained protection against growing threats

✓ Lionic Threat Encyclopedia compiles known intrusion attacks and offers attack data analysis and solutions

✓ Auto-generated daily / weekly report

Security Monitoring + CMS

✓ With a simple management interface and intuitive functions

✓ Language support: Chinese, English and Japanese

✓ Central management system (CMS) for monitoring multiple Ark-UTM 16

Deployment Plan at Your Discretion

Internet — Modem — Dual Ark-UTM 16 — Router — Protected Endpoint Devices

Segmented LAN protection
Isolates viruses within a LAN segment.

Endpoint protection
Deployment in front of production equipment for protection.

Remote protection
Prevent threats from infecting the internal corporate network through VPN connections.
