

Network Security Filters Pico-UTM 100

Securing your IoT environment effortlessly

- ✓ Block Malicious Viruses
- ✓ Block Phishing Websites
- ✓ Block Ransomware
- ✓ Defend Against Vulnerability Attacks

> <https://www.pico-utm.com/>

Good value , Affordable price

POINT 1

Comprehensive Network Security Features

Anti-Virus, Anti-Intrusion, Anti-WebThreat, Anti-Region and Firewall.

POINT 2

Block Ransomware

Obtaining the latest signature files via Lionic's global signature cloud service automatically.

POINT 3

700Mbps

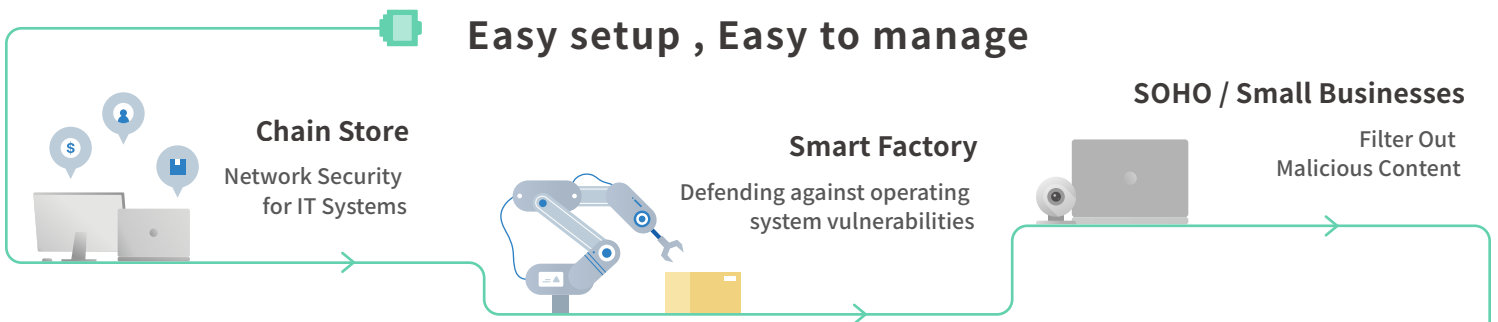

Protecting your network without compromising performance.

POINT 4

Security Monitoring

With a simple management interface and intuitive functions, data analysis is faster.

Easy setup , Easy to manage

Deployment Plan at Your Discretion

Multiple layer protection

Layered defenses for enhancing protection.

Endpoint protection

Deployment in front of production equipment for protection.

Segmented LAN protection

Isolates viruses within a LAN segment.

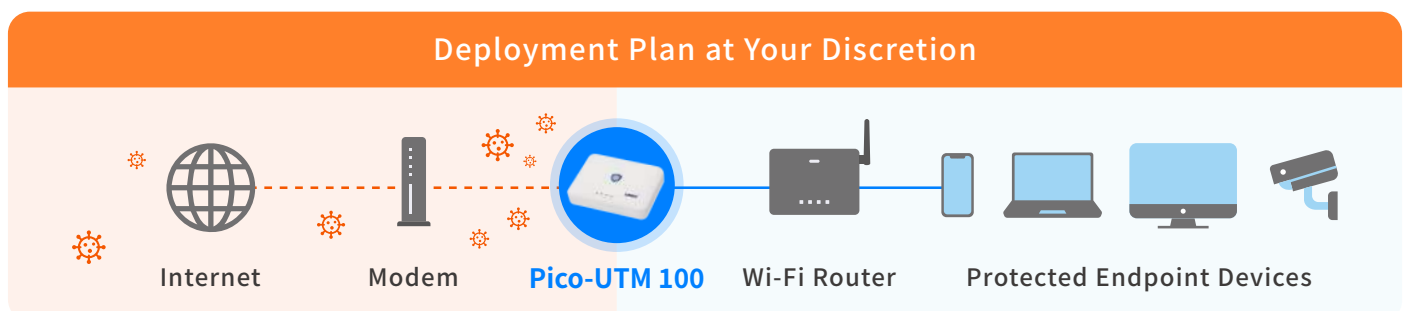

Remote protection

Prevent threats from infecting the internal corporate network through VPN connections.

Deployment Plan at Your Discretion

Low budget achieving **700Mbps** high performance
